🧠 SKILLS

Typescript • JavaScript • React • Redux •
Figma • HTML5 • CSS3 • Sass (SCSS) •
BEM • Bulma • Material UI •
react-router • vue • vuex • nuxt •
swiper • Fetch • Git/GitHub • NPM •
Basic OOP • English upper-Intermediate • —
webpack,rspack

🎓 EDUCATION

Mate academy

(Git, HTML, CSS, JavaScript, Typescript, React, Redux, Web, Vue)

Youtube Channels

"Фрілансер по життю", " Frontend science"

book

"CSS: The Definitive Guide Fifth Edition Web Layout and Presentation [Eric A. Meyer, Estelle Weyl]"

🏆 ACHIVEMENTS

Completed a 10 km run

exemplifying personal determination, endurance, and commitment to maintaining fitness.

Competed in regional taekwondo tournaments

showcasing discipline, focus, and the ability to handle competitive pressure.

Climbed the Homyak and Shpytsi mountains

reflecting adventurous spirit, physical resilience, and mental fortitude in overcoming challenging terrains.

👤 PROFILE

Driven and creative Frontend Developer with nearly 3 years of commercial experience, thriving in a collaborative team environment alongside backend developers, designers, and QA. Skilled in **Vue 3, Nuxt, JavaScript, TypeScript, React**, and **Redux**, with hands-on experience contributing to diverse projects, including a **real estate SPA, e-commerce widgets**, and **cross-platform mobile apps**. Passionate about writing clean, efficient, and maintainable code, I continuously strive to enhance user experience and overall product quality. **Upper-intermediate English**, proactive learner, and strong team player focused on growth and innovation.

🧩 EXPERIENCE

Frontend developer, Frontco

01/2022 – 10/2025

- Developed web applications using Nuxt 3, Vue, Vuex, and TypeScript, Node.js, Lit.js, mongodb
- Collaborated in a team of 5 members (2 frontend developers, 1 backend developer, designer, QA)
- Implemented SSR functionality and optimized page rendering to improve SEO
- Integrated REST APIs and configured dynamic routing using vue-router
- Conducted code reviews and optimized components, reducing load time by 30%

Key Projects:

- Developed a real estate SPA using Vue 3, Nuxt, Swiper, Router with SSR and SEO optimization.
- Built an interactive game for Android/iOS via Vue + Capacitor.
- Helped develop a service provider platform with NestJS, Node.js, MongoDB.
- Wrote logic for an e-commerce widget, adding new features and improving performance.
- Created new frontend features for a banking app, focusing on UI and UX quality.

📁 PROJECTS

Tech-spot

A sleek and user-friendly phone catalog built with React and TypeScript, featuring Redux for state management and Swiper for smooth product carousels. The catalog includes easy navigation with React Router.

Demo 📄 **Github Code** 📄

2048 puzzle game

A browser-based 2048 puzzle game developed using HTML, CSS, SCSS, and JavaScript. Featuring a simple, classic design with smooth gameplay.

Demo 📄 **Github Code** 📄

Adviser elli

a Vue and Vuex-based advisor platform integrating ChatGPT API for intelligent responses. Collaborated closely with designers, backend developers, and QA to deliver a responsive, user-focused experience with dynamic state management."
